Academic Positions

New York University (2022-present)

Assistant Professor / Courant Instructor

- Mathematics at Courant, Computer Science and Engineering at Tandon
- Sponsor: Christopher Musco

Education

University of Washington 2017-2022

Ph.D. in Applied Mathematics

- Thesis: *Lanczos-based methods for matrix functions*
- Advisors: Anne Greenbaum, Thomas Trogdon

University of Washington 2017-2019

M.Sc. in Applied Mathematics

Tufts University 2013-2017

B.S. Summa Cum Laude in Mathematics and Physics; Minor in Studio Art

Research Interests

I'm particularly interested in incorporating probabilistic techniques into classical algorithms to develop methods which are fast and reliable, both in theory and in practice. I hope that my work will help to bridge the gaps between numerical analysis, theoretical computer science, and applied computational sciences such as quantum physics with the ultimate goal of supporting the advancement of knowledge in the basic sciences.

Service and Outreach

Proud to Be First Faculty Connect 2023-2024

Serve as mentor for Proud to Be First Faculty Connect, which pairs second-year, first-generation students with faculty

Math Modeling Workshop nov. 2023

Provide tutorial on randomized linear algebra for the math modeling club

Math Society chalkboard talk nov. 2023

Guest lecture for NYU Math Society on randomized linear algebra

NYU SIAM podcast oct. 2023

Discuss my path as a mathematician, and advice for students, etc.

NYU SIAM Grad School Info Session oct. 2022

Panelist for Q/A session for students interested in grad school

Minisymposium Organizer may 2021

Random matrices and numerical linear algebra (at SIAM Linear Algebra 21, co-organized with Thomas Trogon) [\[program\]](#)

Graduate Student Representative 2019 - 2020

Represent interests of graduate students to the department

Minisymposium Organizer feb. 2020

High performance Krylov subspace methods: Theory, Implementation, and Application (at SIAM Parallel Processing 20) [\[program\]](#)

Diversity Committee Departmental Climate Orientation oct. 2019

Panelist for event focused on building an inclusive department culture

Numerical Analysis Research Club 2019 - 2020

Organize and plan weekly meetings for NARC

SIAM UW Mental Health Conversation and Resources oct. 2018

Organize and facilitate a discussion about mental health in grad school

Software

Research code (<https://github.com/tchen-research>)

Repositories with code to generate figures and experiments from my papers.

Spectral Density (<https://pypi.org/project/spectral-density/>)

Develop `spectral_density` package to efficiently produce spectrum adaptive KPM approximations.

PETSc (<https://www.mcs.anl.gov/petsc/>)

Contribute `PIPEPRCG`. This method can be used by with the flag `-ksp_type pipeprcg`.

mpmath (<https://github.com/mpmath>)

Update matrix multiplication driver to significantly improve performance for sparse matrices.

Awards & Honors

Boeing Research Award (UW Department of Applied Mathematics)	2020
Student Paper Competition Winner (Copper Mountain Conference on Iterative Methods)	2020
Graduate Research Fellowship (NSF)	2019
Top Scholars Fellowship (UW)	2017
The Audrey Butvay Gruss Science Award (Tufts)	2017
Phi Beta Kappa (Tufts)	2017
Sigma Pi Sigma Physics Honors Society (Tufts)	2016
The Howard Sample Prize Scholarship in Physics (Tufts)	2015
